To Whom It May Concern:

Re: Tyee Log Homes

We are writing this letter in reference to the work done by Tyee Log homes in the construction of our home in Kimberley, BC.

Tyee designed and built our home + acted as the general contractor for all subtrades (e.g., plumbing, etc.).

I have many friends who had a custom homes built for them by other builders – and most ended up with many regrets and hard feelings from the experience. IN contrast, our experience with Tyee was very positive. The company went “above and beyond” their call of duty on many fronts (e.g., spending the time to select unique logs for the building, making many design suggestions, etc.). We are extremely satisfied with their craftsmanship, commitment to quality, and overall project management.

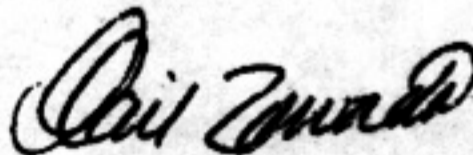

We have also been very pleased with their follow-up after the project.

If you have any questions, feel free to call us at (250) 425-6573, or (250) 520-0217.

Sincerely,

Craig C. Zawada
