To Whom It May Concern:

This letter is a recommendation for TLH Log Homes as a builder of quality homes.

In August of 2006 TLH Log Homes began the construction of our home and on January 31, 2007 we moved in. During that time I was an onsite owner and I can vouch that Carl Lauren and his people were totally committed to building a quality home and bent over backwards to satisfy any of our requested changes even if it meant some work had to be redone.

Most city inspections passed without any defects and the odd one that did have an item to rectify was corrected immediately and passed on the next inspection.

After we moved in there was a deficiency list that had several minor items on it. These items were quickly taken care of and we have been very proud owners of our TLH Log Homes home from day one.

One point that I consider as being a sign of a quality house is that there are no drafts. Our home is airtight and is comfortable on the coldest winter evenings.

Yours truly,
Ralph Jones
